OMAR SALAMA

Full-Stack Developer | Software Engineer | UI/UX Designer

+201067655094 | omar.m.salama10701@gmail.com | linkedin.com/in/omar-salama-2106a6296 | Nasr City, Cairo, Egypt

PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer and Software Engineer with a B.Sc. in Computer Science from AASTMT. Experienced in architecting and delivering production-grade mobile applications, web platforms, admin dashboards, and payment gateway integrations from the ground up. Proven ability to bridge communication gaps between business stakeholders and development teams, conduct end-to-end QA analysis, and rebuild legacy systems with scalable architecture. Proficient in Flutter, React.js, PHP/Laravel, WordPress, Python, and AI/ML integration. Adept at leading technical direction independently and delivering complete solutions in fast-paced startup environments.

PROFESSIONAL EXPERIENCE

Full-Stack Developer & Software Engineer Jun 2025 – Present

SirApp Technology | Cairo, Egypt

- Designed and launched the company website (sirapp.net) using WordPress, establishing the company's digital presence from scratch.
- Conducted comprehensive QA analysis of existing native Android applications; identified and documented critical database and backend deficiencies blocking production readiness.
- Served as the sole technical liaison between the business owner, operations manager, and an external development company; synthesized conflicting requirements and produced structured technical specifications.
- Led the decision to rebuild the entire application suite after the external codebase proved unfit for production; managed the full architectural transition independently.
- Developed two cross-platform Flutter mobile applications (Client App & Provider App) that communicate with each other via a shared backend, replacing the previous native Android solution.
- Integrated Mastercard and EBC (Egyptian Banks Company) payment gateways into both mobile applications.
- Built a main admin dashboard for real-time operations and user management.
- Developed a dedicated wallet dashboard for financial tracking and transaction management.
- Built a full EBC integration system with a management dashboard to handle payment flows and reconciliation.
- Architected and delivered a company-scale integration portal (sir-portal v2.2) in React.js, bridging features across both mobile apps and enabling unified management at company level.

Graphic Designer Feb 2022 – Apr 2024

Enactus AAST (Non-Profit, Social Entrepreneurship) | Cairo, Egypt

- Created visual content for social media campaigns, print materials, and marketing banners.
- Collaborated with cross-functional teams to deliver engaging, on-brand design solutions under tight deadlines.

PROJECTS

Sortify — AI-Powered Waste Sorting System (Graduation Project) Sep 2023 – Jun 2024

Role: Team Leader & AI Engineer | Technologies: Python, AI/ML, Mobile App, Hardware Integration

- Led a multidisciplinary team in building a smart waste sorting system using AI, integrating software and hardware to automate recycling processes.
- Managed the full AI model lifecycle — training, optimization, and deployment — ensuring seamless software-hardware integration.

Shogolify — AI-Powered Job Search Platform Feb 2025 – Mar 2025

Role: UI/UX Designer & Developer | Technologies: Figma, FigJam, Adobe Illustrator

- Designed and prototyped an AI-driven job search platform for the Middle East, featuring resume matching, career roadmaps, freelance/full-time hybrid models, and gamified job applications.

HeavyRent & Al-Naeb Ismail — Flutter Mobile Applications Jul 2025 – Aug 2025

Technologies: Flutter, Dart

- Built two complete Flutter mobile applications as part of advanced Flutter development training.

Task Management System Aug 2025 – Sep 2025

Technologies: PHP, Laravel

- Built a full-featured task management web application using PHP and Laravel as a course capstone project.

Orix Creative Clone — Full-Stack Web Application Mar 2025 – Apr 2025

Technologies: React.js (Vite), PHP, Laravel

- Replicated the orixcreative.com website using React.js with Vite on the frontend and Laravel PHP on the backend, demonstrating end-to-end full-stack development proficiency.

TECHNICAL SKILLS

Languages & Frameworks	Flutter/Dart, React.js, PHP/Laravel, JavaScript (ES6+), Python, HTML5, CSS3, C++, Java, SQL
Mobile Development	Flutter (Cross-Platform iOS & Android)
Web & CMS	WordPress, React.js (Vite), Laravel REST APIs
Payment Integration	Mastercard Payment Gateway, EBC (Egyptian Banks Company)
Databases & Backend	MySQL, SQL, Backend Architecture, Database Design
AI / ML	AI Model Training, Integration & Optimization, Data Processing & Scripting
Design Tools	Figma, FigJam, Adobe Photoshop, Adobe Illustrator, Adobe Premiere
Methodologies	Agile, QA Testing & Analysis, System Architecture, Requirements Engineering
Productivity	Git, JSON, Microsoft Excel, Word, PowerPoint

EDUCATION

B.Sc. in Computer Science Sep 2020 – Jul 2024

Arab Academy for Science, Technology & Maritime Transport (AASTMT) | Sheraton, Cairo, Egypt

CERTIFICATIONS & TRAINING

- Frontend Development with React.js
- UI/UX Design
- Python & Artificial Intelligence
- Flutter Mobile App Development
- PHP & Laravel Web Development

ADDITIONAL INFORMATION

Languages	Arabic (Native), English (Advanced – C1)
Key Achievement	First and sole technical hire at SirApp Technology; independently architected and delivered the company's entire technology stack — two Flutter apps, three dashboards, a payment integration system, and a company-wide integration portal.
